

Demonstration of Proposed Features

Date	01 October 2026
Team ID	6ab2251f18c49545982255a8
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Mandatory Fields (UI Policy)	UI Policy on the Incident form makes Short description and Category mandatory so incidents are never saved incomplete.	Implemented	Yes	Runs on load and change.
2	Conditional Field Visibility (UI Policy)	When State = On Hold, the 'On hold reason' field is shown and made mandatory; it is hidden for all other states.	Implemented	Yes	Fields reset when state changes.
3	Read-only on Closed (UI Policy)	When State = Closed, key fields (Caller, Category, Short description) become read-only to prevent edits after closure.	Implemented	Yes	Applies on State change.
4	Category onChange Script (Client Script)	onChange client script on Category clears the Subcategory value so users must pick a valid subcategory.	Implemented	Yes	Uses g_form.clearValue().
5	Impact / Urgency Alert (Client Script)	onChange client script on Impact and Urgency shows an info message when High/High is selected, warning of a Priority 1 incident.	Implemented	Yes	Uses g_form.addInfoMessage().
6	Resolve Validation (onSubmit Client Script)	onSubmit client script blocks saving with State = Resolved unless Close notes are filled in, and shows an error message.	Implemented	Yes	Returns false to stop submit.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6

Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
