

Brainstorming & Idea Prioritization Template

Date	05-10-2026
Team ID	6ab2256ffc67a5bc022256a7
Project Name	Script_Controlled ACL Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

Team Member	S.No	Idea / Suggestion	Category	Group No.
Member 1	1	Implement Server-Side Scripted ACL evaluating current user roles and record status field	Access Control Logic	1
Member 2	2	Use Client Script & UI Policy to hide fields based on field value changes dynamically	UI Security	2
Member 3	3	Combine Scripted ACL with Query Business Rules to restrict record visibility in list views	Data Security & Filtering	3
Member 4	4	Utilize System Property checks inside ACL scripts to allow configurable access control thresholds	Access Control Logic	1
Member 1	5	Restrict record read/write permissions via Data Lookup Rules based on field status	Access Control Logic	1
Member 2	6	Implement Data Filtration Plugins to govern record-level read access conditionally	Data Security & Filtering	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority Selected (Yes/No)
1	Server-Side Scripted ACL with System Property evaluation to enforce dynamic record-level access based on field values.	High	High	Yes
2	Client-Side Scripting & UI Policies to control field visibility.	High	Low	No
3	Query Business Rules combined with Data Filtration for list-level access restriction.	Medium	High	No
