Project Name	Script_ Controlled ACL _ Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Project Initialization and Planning Phase

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	ServiceNow Administrator / System Security Engineer.	Restrict record access dynamically based on specific field values (e.g., Confidential state or Sensitivity Level).	Out-of-the-box role-based ACLs allow access to all records in the table regardless of field conditions.	Standard ACL conditions cannot evaluate complex runtime logic or dynamically evaluate record-level attributes.	Concerned about potential data leaks and unauthorized record visibility across departments.
