

Project Executable Files

Date	05-10-2026
Team ID	6ab2256ffc67a5bc022256a7
Project Name	Script_ Controlled ACL _ Restrict Record Access Based on Field Value
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all XML update sets / JS files)	Yes
2	README / Setup Guide (instructions to import update set)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (Table definition XML)	Yes
5	Environment configuration file (.env.example or sys_properties)	Yes
6	Deployed application URL (ServiceNow PDI Instance)	Yes
7	Executable binary (Update Set .xml file)	Yes
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results (ATF Automated Test Suites)	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/servicenow-acl-project
■■■■ update_sets/
■ ■■■■ sys_remote_update_set_script_controlled_acl.xml
■■■■ src/
■ ■■■■ acl/
■ ■ ■■■■ record_write_acl_script.js
■ ■■■■ script_includes/
■ ■ ■■■■ RecordAccessEvaluator.js
■ ■■■■ client_scripts/
■ ■■■■ LockClosedFields.js
■■■■ tests/
■ ■■■■ atf_test_suite_acl_validation.xml
■■■■ docs/
■ ■■■■ Architecture_and_Security_Flow.pdf
■■■■ README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://devXXXXX.service-now.com
Repository Link	https://github.com/6ab2256ffc67a5bc022256a7/servicenow-script-acl
Login Credentials (Demo)	Username: admin Password: DemoPassword123!
Hosting Platform / Provider	ServiceNow Personal Developer Instance (PDI)
Demo Video Link	https://youtu.be/demo_script_controlled_acl

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- 1. Log in to your ServiceNow Developer Instance as Administrator.
- 2. Navigate to **System Update Sets > Retrieved Update Sets**.
- 3. Click **Import Update Set from XML** and upload sys_remote_update_set_script_controlled_acl.xml.
- 4. Open the imported Update Set, click **Preview Update Set**, verify 0 errors, and click **Commit Update Set**.
- 5. Test by opening an Incident record: set state to 'Closed' and verify write permissions are dynamically restricted.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Cached ACL permissions require browser refresh after state change	Form Client Script triggers page reload on state transition to 'Closed'
2	Admin users bypass field restrictions by default	Intended platform behavior; admin role explicit override rule added in ACL setup
3	REST API updates bypass client-side validations	Enforced backend Scripted REST API validation in addition to ACL rules
