

Demonstration of Proposed Features

Date	05-10-2026
Team ID	6ab2256ffc67a5bc022256a7
Project Name	Script_ Controlled ACL _ Restrict Record Access Based on Field Value
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S. No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Server-side Field Value Evaluation	Dynamically evaluates record field values (e.g., current.u_confidential) inside server-side ACL script.	Implemented	Yes	Verified viaGlideRecord script evaluation in ServiceNow.
2	Role & Group Permission Checks	Restricts record read/write access to specific user roles or assigned group members using gs.getUser().	Implemented	Yes	Access correctly granted to security admin role.
3	State-Based Edit Restriction	Prevents write/edit operations once record state moves to 'Approved' or 'Under Review'.	Implemented	Yes	Form fields read-only upon state transition.
4	User Impersonation & Security Debugging	Validates ACL rules by impersonating different user profiles and reviewing Security Debugger output.	Implemented	Yes	Verified list & record-level visibility restrictions.
5	Departmental Multi-Tenant Segregation	Matches logged-in user department with record u_department field to restrict cross-department visibility.	Implemented	Yes	Tested across distinct department accounts.
6	Update Set Packaging & Deployment	Captures all configured ACL rules and scripts into a standard Update Set for migration.	Implemented	Yes	Committed update set successfully.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
